How to remove a simplex push button lock

How to remove a mortice lock without key. How to remove a simplex door lock.

I-1 Make sure the grab of the lever is updated as shown (c). The grip of the lever shall be discharged around the outer diameter of the external driver. Make sure that lever sleeve (f) © rotated to mate properly with the outer/hand lever. I-2 Insert one of the provided keys (a) into the outer/hand lever (b) and rotate the 45 degrees of the clock key. I-3 Insert outer lever/hand lever (b) © which is discharged to the whole of the outer unit (the levers fit closer than the buttons). Hold the lever/hand exterior by turning the grades of the clock key 45 to the horizontal position. Remove the key. Note: To remove the lever/outer hand from the outer unit assembly, follow the steps below. I-4 Insert one of the provided keys (a) into the outer/hand lever and rotate the 45 degrees. Insert the d and release tool (d) into the small hole (e) under the lever/hand, as shown. Gently press the lever to reach it © click. Remove the tool then remove the outer/hand lever. J. LEVER/KNOB INSTALLATIONS/REMOVATIONS Note: Installing levers/hands in unit assemblies before assembling unit sets can facilitate the initial installation. J-1 Make sure that lever catch is © updated as shown (c). The grip of the lever shall be discharged around the entire diameter of the external driver. Make sure that lever sleeve (f) © rotated to mate properly with the outer/hand lever. J-2 Insert outer lever/hand lever (a) © which is discharged to the assembly of the outer unit (b) (the levers fit closer than the hands). Insert the throw tool (d) (or screw controller) into the outer/hand lever as shown, and slide the catch lever down to the bottom © click. Note: For all interchangeable/removable keys, ASSA/Medeco/Yale, proceed to J-3 section. For ASSA/Medeco/Yale heads, jump to section J-5. b to e d to b to 45 and d to b to e d to correct Incorrect IC Position N o © Top of LH RH b a d 9 How does a Kaba lock work? How do I restart my Kaba digital lock? How to restart a combination lock have you forgotten the saying? How is it? © that a push button closes How do LcckS work from digital ports? How do you restart a 3-digit lock? How do you change the Borglock codes? Simplex mechanical pressure closures are an easy solution to control unwanted access to restricted areas. If you are having trouble with your current button lock, consider a conversion to Simplex. Recently, a local Tampa businessman asked me to replace his defective biometric lock with a Simplex L-1000 mechanical lock with push button. I knew this would not be the typical scene of removal and replacement. My goal was to cover the preparation of the existing door (holes) and install the Simplex lock. Here's how to make it is... Follow the steps 1-8 Steps 1- Remove the existing lock. Step 2 - Insert a 1 inch plastic hole filler into the frame. Step 3- Center an aluminum plate 3-1/2 x 15 on each side of the door. Using a wrap and painter's tape to ensure both sides are leveled. Step 4- Attach your Jig using the appropriate back set. Make a hole of 2-1/8. Step 5- Use a Simplex installation model. Make two 1/4 inch holes and a 1 inch hole. Step 6- Install the latch and a filling plate. Step 7- You may need to add a spacer to Simplex to compensate for the thickness of the door. Step 8- Install Simplex and is complete! If you are considering a Simplex upgrade for your business, call Budget Mobile Locksmith's 962-1121 number (813) to get a free estimate. Thank you for your consideration. Tags: Simplex Lock No products in the cart... :(Image not available forColor: To view this video download Flash Player
